- As a tech-savvy person, I love to interact with new technologies.
- I am passionate about polishing my IT skills and making a successful career in the software industry.
- I want to become a Fullstack developer because I value the versatility and market value of having a comprehensive understanding of both front-end and back-end development.
- I enjoy the challenge of working independently or as part of a team to build complex web applications from start to finish.
- I am committed to consistently honing my programming skills, with a particular focus on problem-solving algorithms.
- My ultimate goal is to participate in competitive programming competitions, so I regularly research and analyze the challenges faced by other programmers and devise solutions to overcome them.

Work Experience

Full Stack Web Developer

Khired Networks - Lahore, Punjab

2022 to 2023

- Utilized React and TypeScript for proficiently constructing intricate components and designing intuitive user interfaces on the front-end.
- Leveraged Laravel on the back-end to effectively manage data storage and organization, while ensuring seamless functionality of all client-side operations.
- Implemented a secure exchange of information over the internet by utilizing the RESTful API interface.
- Extensively customized the Google Maps API to meet the unique requirements of client.
- Employed SQL to execute a multitude of tasks, ranging from updating data in a database to retrieving relevant information from it.
- Used Redux and helped app to scale by providing a sensible way to manage state through a unidirectional data flow model.
