## PROJECTS

### [Pushi](#) — *Freelance Martek Place.*

It should display what all you need to offer – different gigs, your reveal in, schooling, skills, certifications, and extra. It should spotlight how prolific you are with deliveries, what other consumers think about you, your verbal exchange frequency, and most significantly – in case you are the proper individual for the job.

Based on:

HTML5, CSS3, Tailwind CSS, Alpine.js, JavaScript

### [Peeksta](#) — *TikTok Products Fetcher Dashboard.*

This dashboard serves as a central hub for TikTok's content creators and influencers who want to promote products on their TikTok videos. It provides a user-friendly interface with powerful features that simplify the product selection and integration process.

Based on:

HTML5, CSS3, Tailwind CSS, Alpine.js, JavaScript

### [Ecomload](#) — *Products and Store Tracking Dashboard.*

The dashboard also offers robust reporting and analytics capabilities, allowing businesses to gain valuable insights into their sales performance, product popularity, and overall store metrics. It provides visualizations and charts that enable users to identify trends, patterns, and areas for improvement. This data-driven approach empowers businesses to make informed decisions and optimize their product offerings and store operations.

Based on:

HTML5, CSS3, Tailwind CSS, Alpine.js, JavaScript

### [Winnarz](#) — *TikTok Business Ad Landing Page.*

This landing page is specifically crafted to seamlessly integrate with TikTok's advertising platform, allowing businesses to create compelling ad campaigns that drive traffic and conversions. The landing page serves as an extension of the ad itself, providing a visually stunning and interactive experience for users who click on the ad.

Based on:

HTML5, CSS3, Tailwind CSS, Alpine.js, JavaScript
