EXPERIENCE

P2P Cloud

Frontend Developer Jan-2023 - Present

Designed, develop, and maintain responsive and user-friendly websites using programming languages such as HTML, CSS, and JavaScript. Collaborate with cross-functional teams to gather requirements and implement new features and functionalities for web applications.

Here I designed the following given below Website.

- **https://hi-techno.netlify.app/**
- **https://foodies1122.netlify.app/**

Self-Learning Projects.

1. **Weather App**
   Using react.js, MUI, fetching and showing data from 3rd party API. Use react routing to navigating to other pages.
   - https://weatherapp1121.netlify.app
2. **Facebook Clone**
   Using react.js, MUI for icons, CSS to make it attractive, Context API to pass value to specific nested component, and use firebase Google Authentication for Login and Fire store for database.

SKILLS

1. Computer programming in [JavaScript Fundamentals + ES6, HTML & CSS].
2. JavaScript library (React.js).
3. Material UI, Bootstrap, Tailwind CSS.
4. Mobile-First Approach & Fully responsive design for websites.
5. React Context-API, React-Router & React-Navigation.
6. Working collaboratively.
7. Friendly, positive attitude.
8. Microsoft Office Suite.
9. Multitasking.

3. **Chatmate Web Application**
   Using react.js, MUI for icons, CSS to make it attractive, React Routing for pages navigation, Context API to pass value to specific nested component, and use firebase Google Authentication for Login and Fire store for database.

Mindbridge Private Limited
