Full Stack Web Developer with an excellent problem-solving skill set, bringing 2 years of hands-on experience in React.js, Vue.js, Node.js, JavaScript, Laravel, MySQL, HTML5, and SCSS, seeking a career in the development field.

## Work Experience

---

### Full-Stack Web Developer (Remote)

CrexDigital - Detroit, MI

March 2023 to Present

- Worked with team of developers to create a management solution for therapists and their clients in React.js
- Successfully developed a website for a construction company in US

### Full Stack Developer (Intern)

AlphaSquared - Lahore, Punjab

March 2022 to March 2023

- Successfully converted a excel based software-house management tool into a web-based management system utilizing Laravel, Vue.js, Bootstrap, HTML5 and SCSS.
- Handled project deployment, reviewed code, and maintained documentation of this project.

### Full Stack Developer (Remote)

XPulz - Detroit, MI

October 2021 to January 2022

- Worked with a team of developers to fully revamp a highly interactive online gaming portal with React.js in the frontend and Node.js in the backend, distributed on AWS.
- Successfully made this platform 3x faster, which also consumed almost half the bandwidth and server resources.
- Worked closely with the product team on the scope of this project.
