Team Worker

PERSONAL PROJECTS

hospital mangement system

- In this i give feature to hospital to have their records and by this project they can manage their hospital's activites properly. In this project, I tried to minimize the paper works in a municipality and further balancing good communication between the municipal employees. Thus, the manual errors will be reduced. Further, we can also include extra security for the data that is stored in the database. That is if a person is viewing their Application Status rather than others, it should show only theirs. this was a local serve site just to keep their records

ACHIEVEMENTS

COD4 winner Streak for 2 years in Campus (01/2018 - 01/2020)
