EXPERIENCE

Internship:

Front-end Developer at Bsource.INC

October 2022 - January 2023

I have been serving as the Front-end Developer. I am mainly working on the projects and my core responsibilities are to resolve all the bugs. I reported and solve issues by QA, and the end user and also to integrate and update new features and requirements. Other than development, I design user friendly user interfaces. Other than these, following are also my key responsibilities.

- Prioritizing user experience
- Bringing a concept to life with HTML, CSS, JavaScript, React
- Production and maintenance of websites and web application user interfaces
- Creating tools that enhance interaction with the site in any browser
- Implementing design for mobile sites
- Maintaining software workflow management
- Testing the site for usability and fixing any bugs
- Managing the delivery of multiple complex simultaneous system development projects from design through to release
- Capable of understanding and contributing to the technical solution from design through to code level
- Working closely with Development Project Managers and Business Analysts to produce accurate delivery estimates and manage the transition from analysis through to design and delivery
- Provide regular and effective progress updates to and work closely with Development Project Managers to ensure the management of any delivery risks or issues
- Define delivery phases of the project including activities, sub-activities, and milestones ensuring these are documented and used as the basis for the project event log, issues and risk log and any subsequent reporting
