#### NODE0 COMPUTING (PVT)-ONECALLAPP

06/2022-PRESENT

I have worked with one of the leading IT company to make scale-able and high performing software solutions using front end(HTML5,CSS3,Javascript,Bootstrap, Redux and Api's integration) with the team of many Software Engineers to get valuable skills and advice to make better solutions for ever growing and rapidly changing market.

## PROJECTS

### BOOK-ME (FINAL YEAR PROJECT)

- This project about online booking system like cinemas ticket, bus ticket and train ticket.

### ONECALLAPP

- This project is related about affiliate marketing , online delivery of medicines and grocery.
- you can hire maid,driver,office boy,plumber etc through this application.
- you can get your polling booth details during elections.
- i work in this project as a Frontend developer and implement authentications module, routing ,pagination and responsive design

### HTB

- This is Internal Product which have two portals Investor and Admin. The idea is Investors select a plan for investment and then their investment is cut off from their salaries on each month. Profit or Loss shared between members in HTB tokens.
