## Work Experience

### FINAL YEAR PROJECT

#### Enterprise Resource Planning (ERP) MERN STACK

Easify" is a web-based ERP (Enterprise Resource Planning) system for Makkah Fabrics to maintain its finances and employees. Easify provides different functionalities like maintaining account ledgers, company invoices and expenses, and inventory. The company can now perform all its operations through one digital platform and have all the records and reports in a secure space.

##### Objectives

1. Digitize all the company's operations.
2. The company would maintain its accounts and invoices.
3. Make the platform secure for the data to be safe.
4. Manage the inventory of company to keep track of the stock.
5. Provide all reports and stats by just the click of a button.

### LIBRARY MANAGEMENT SYSTEM

The system allows librarians to manage the books in their collection, including adding new books, updating book information, and deleting books that are no longer needed. The system also allows users to search for books by title, author, or subject, and to check if a particular book is available for borrowing.

I implemented the system using Node.js as the backend technology with Database MYSQL
