Lahore, Pakistan

As a Laravel developer with 6 months of experience, I have honed my skills in HTML, CSS, Bootstrap, PHP, Laravel, and database management. I have experience in developing web applications that are responsive and user-friendly. My expertise in front-end development ensures that the applications I develop are visually appealing and easy to navigate.

In my work, I have demonstrated proficiency in developing dynamic web applications using Laravel's powerful features. I have experience in designing and implementing database schemas, managing database migrations, and querying databases using Laravel's ORM. I am a fast learner and always seek to expand my skill set. Overall, I am a committed and detail-oriented Laravel developer with a strong passion for developing high-quality web applications.

Here i worked on several professional projects which boost my confidence as a laravel developer

Projects

Let Mobile	Dec 2022 - Present (5 months)
------------	-------------------------------

Company: Let Mobile / Let Mobile

<https://letmobile.pk/>

Tools: Html , Css, Bootstrap, Laravel, Letmobile

I developed a web-based platform using Laravel that enables users to buy and sell both new and used mobile phones. The platform features a user-friendly interface that allows users to browse available listings, view product details, and contact sellers directly. As the developer, I implemented a robust and secure system for user authentication, product management, and payment processing. Through the use of Laravel's powerful features, I was able to develop a highly scalable and reliable platform that met the needs of both buyers and sellers in the mobile phone marketplace.
