

# MUHAMMAD AHMAD SHER

0314-4025051 | ahmdshrkhnn@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#)

Motivated and detail-oriented Web Developer with a strong foundation in HTML, CSS, JavaScript, Php and Laravel. Equipped with extensive knowledge of web development frameworks, including React. Skilled in version control systems such as Git, ensuring efficient collaboration and code management.

## EDUCATION

### University of the Punjab

*B.S-Information Technology*

Lahore, Punjab

September 2018 – April 2023

- **CGPA:** 3.24
- **Relevant Courses:** Programming Fundamentals, Data Structures and Algorithms, Internet Programming, Software Quality Assurance, Project Management and Software Engineering.

## PROJECTS & OUTSIDE EXPERIENCE

### [Autozone](#)

University of the Punjab

*Final year Project*

- The application has three main modules, built using HTML, CSS, JavaScript, Bootstrap, **PHP, Laravel** and **MySQL**:
- **Rent a Car:** This module allows users to rent cars based on their preferences such as car type, rental period, and location. Users can browse through available cars, select the one they want, and make a booking.
- **Car Services:** This module provides information about car services such as car wash, oil change, tire change, and other maintenance services. Users can choose the service they need and schedule an appointment with the service provider.
- **Autoparts:** This module enables users to search for and purchase auto-parts. Users can browse through different categories of auto-parts.

### [Login & Registration Form](#)

*Personal Project*

- Developed a login and registration system in **PHP MySQL** with email verification and **authentication**. This system provides a secure way for users to create an account and access the website's features.
- The email **verification** feature ensures that only valid email addresses are registered, and the authentication feature adds an extra layer of security to the login process

### [BloggY](#)

*Personal Project*

- Developed a login and registration system in **PHP MySQL** with email verification and **authentication**.
- Created a blog website using **Php** and **MySQL** that allows users to post their own blog entries and upload a thumbnail image along with their blog post.
- Users can also finalize a category for their post from a list of predefined categories, and the website includes a **dashboard** where users can view and manage their posts.
