PERSONAL PROJECTS

Furniture Shop Management (02/2021 - 05/2021)
- We are going to create a real time project. In our project we create a furniture shop management system in which user can see all furniture product, ordering new product and buy all kind of furniture.Admin can delete, updates, Dispatch order list, manage bills, equipment bills and all expanse that come on it. Manager see the all activity that perform on portal such as profits etc

Fair Price shop (9/2022 - 10/2022)
- This website is designed to provide information about this charity to the user. This is made for helping those childrens who are not able to fulfil their basic requirements.

News Site (01/2023 - 02/2023)
- News Portal Project using Frontend (BOOTSTRAP) For PHP and MySQL is a web based application. It is a dynamic system. It can be maintain and changed easily because it is based on database. It's contain web pages that are generated in real-time. These pages include Web scripting code, such as PHP. It is fully secured from unauthorized access. In a word In a word it can say that our Online News Portal website is a completely dynamic website.

Ecommerce Website (03/2023 - 05/2023)
- E-Commerce Website using PHP and MySQL For Frontend(BOOTSTRAP)
- This Project is divided into two categories :
- Category 1: Complete E-Commerce including complete user and admin dashboard.
- Category 2: Advance topics like payment options,making website responsive ,sending mails to user and online deployment of project.

ESHOP (05/2023 - Present)
