WORK EXPERIENCE

➤ **AirDen - Internee (React Js)**

(December 2022- February 2023)

Responsibilities are as follows: -

- During my internship at Airden, a leading React JS development company, I gained practical experience in developing innovative solutions using this technology.
- Working on real-world projects, I collaborated with a talented team, honing my coding skills and understanding best practices in React JS development.
- The company fostered a culture of continuous learning through workshops and knowledge sharing sessions, ensuring that I stayed up-to-date with industry trends.
- Overall, my internship at Airden was a rewarding experience that provided me with a solid foundation in React JS development and instilled a passion for creating robust web applications.

➤ **IT Officer (Paramount Distributors)**

(June 2021 - November 2022)

Responsibilities are as follows: -

- Paramount Distributions is a company that specializes in the distribution of various products to different locations.

- As an IT Officer, My role involves managing the company's technology infrastructure, including hardware, software, and network systems.
- I'm also responsible for providing technical support to employees and ensuring the security of the company's data.

➤ **Lecturer - Computer Science (Ideal Science College Narowal)(July 2020 - April 2021)**

Responsibilities are as follows:

- Preparing and delivering lectures and presentations on computer science topics to students.
- Designing and developing course curricula and materials for computer science classes.
- Evaluating student progress and assigning grades, as well as providing feedback on assignments and assessments.
- Conducting research in computer science and publishing papers in academic journals or presenting findings at conferences.
- Mentoring and advising students on their academic and career goals in computer science.

➤ **DSC Core Team Member (Google Developers) (August 2019 - September 2020)**

Responsibilities are as follows: -

- As a core team member of the Developer Student Club, I'm responsible for helping organize and promote events, workshops, and other initiatives aimed at educating and empowering student developers.
- This may include planning and executing events, managing social media accounts, communicating with partners and sponsors, and collaborating with other team members to achieve common goals.

MAJOR PROJECTS

1. React Notes App

I will build a notes app where users can enter text to each note and save it in using mock API, delete an existing note, dynamically search among the notes and add character limit.

2. React Quiz App

The React quiz app is a web-based platform that allows registered users to attempt quizzes from different subjects. The app provides an interactive user interface and allows users to track their progress and performance.

Qualifications

Bachelor of Computer Science (BSCS)

Virtual University of Pakistan, Narowal - Pakistan (October 2018- September 2022)

Full Stack Development (Web Development)

National Initiative For Artificial Intelligence and Security, Narowal - Pakistan
(2019 - 2020)

Intermediate in Science (FSC Pre - Engineering)

Post Islamia Graduate Degree College, Narowal - Pakistan (August 2015 - September 2017)

Matriculation in Science (Major: Biology, Math, Chemistry, Physics)

Government High School, Nidokey - Pakistan (2015)

Key Accomplishments: -

As a React-Js developer, I specialize in creating visually appealing and functional interfaces that meet user needs and enhance the overall user experience. With proficiency in HTML, CSS, JavaScript, React.js, and front-end frameworks, I am able to design and develop responsive and dynamic web applications that align with industry standards and best practices. I am committed to constantly expanding my skill set and staying up-to-date with emerging trends and technologies in the field of front-end development.
