EXPERIENCE

Online College e System (FYP)

Online college assignment system in php and CSS html is the mini project for managing the assignment among the teachers and students. The project contains the admin side and the user side. The admin can view all the users add manage assignment, lectures, and so on. They can update every user 's details as well as delete their accounts.

For the user side, a user can either be a student or lecturer. A student user can register & login their account to look for their subject models and works. While a lecturer can register & login their account to look for their subject models and assignment, students, and so on. This project can make a convenient way for the college to provide assignment details to their students.

About System

This Assignment Management is in php and CSS. Taking about the features of the system it contains the admin and user sections. From here, the admin can view all the users, add/manage modules, assessment, etc. the design of this project is pretty simple so that the user won't find any difficulties while working on it.

EXPERIENCE

Single Page Application in ZOHO CREATOR

I have three months of experience in front-end development using HTML, CSS, Bootstrap, JavaScript. I create many weights to fetch data from zoho creator database and display on frontend and use functions frontend data save on database, I have experience in JavaScript to create website frontend. If you give me a chance I can prove it.

I also have experience in WordPress website development. I develop mor then five website for company using different plugin for customer's.
I build custom website for customer. Which fulfill the requirements of customer as he desired.
