EXPERIENCE

Fortex Solution, Lahore— *Internship (Backend Developer)*

Oct 2022 - Jan 2023

I was assigned to integrate a Laravel-based database and APIs into a job posting platform to create a user-friendly system for job seekers to find relevant job postings quickly and for employers to post jobs and manage applicants seamlessly. I successfully implemented a robust database that efficiently stores and contains job postings and applicant data, and I also created APIs that connected the front-end interface of the platform with the database, enabling users to interact with the system seamlessly.

EDUCATION

The University of Lahore, Lahore— *Bs Computer Science*

2018 - 2022, CGPA: 3.10

Kips College, Lahore— *Intermediate*

2016 - 2018

St.Andrew High School, Karachi— *Matriculation*

2014 - 2016

PROJECTS

Animal & birds Market— *Final Year Project*

Our platform was designed with a user-friendly interface to make it easy to purchase various breeds of pets and locate nearby pet services such as veterinarians, food stores, and accessories.

Student Database Management— *Database System*

The system was created to maintain records of student attendance, fees, scholarships, and academic results.

Emotion Recognition— *Artificial intelligence*

Emotion recognition is an advanced image processing technique that enables software to detect and interpret human facial expressions as an indicator of emotional state.
