MUHAMMAD TAHA

PHP Laravel Developer

Summary

As a PHP Laravel developer, I bring expertise in a range of web development technologies including JavaScript, MySQL, AJAX, jQuery, Bootstrap, CSS, HTML, and React. I have 1 year of experience developing e-commerce, invoicing, and matrimonial websites, and am highly skilled in working with REST APIs, SQL databases, and third-party payment gateways. Additionally, I have a strong understanding of ORM and prioritize writing maintainable code to ensure long-term success for my projects.

Islamia University Bahawalpur:
BS Information Technology with **GPA 3.5**

Skill Highlights

- HTML
- CSS
- JavaScript
- jQuery
- React
- AJAX

- PHP
- Laravel
- My SQL
- OOP
- TDD
- GIT

Experience

Glims Tech Bahawalpur (1year)

During my time at Glims Tech, I worked on multiple projects as a PHP Laravel developer, gaining valuable experience in web development. Here's an overview of some of my work:

E-commerce website: I worked on a project to develop an e-commerce website , using Laravel and Bootstrap. I was responsible for developing the product catalog, cart functionality, integrating payment gateways, APIs for mobile app and employes managements system for their physical stores.

Invoicing system: I worked on an invoicing system for a client, using Laravel and jQuery. My responsibilities included designing the database schema, developing the user interface, maintain ledgers and integrating with third-party APIs.

Matrimonial website: Contributed to the development of a matrimonial website, where I developed the user registration and profile creation functionality, as well as the search and matching algorithms.

Throughout my time at Glims Tech, I gained experience working with SQL databases, REST APIs, and React. I also developed a strong understanding of ORM and the importance of writing maintainable code.
