Vocolox

Full Stack Web Developer

- Maintained complex technology infrastructure and collaborated with product team to implement new features and strategically plan for future products.
- Used Typescript, with popular JS frameworks to develop app-solutions.
- Worked with back-end developers to design APIs.
- Used NodeJS, ORM and SQL/No-SQL to develop and manage databases.
- Developed efficient and maintainable software according to business objectives and needs of clients.

Projects

ERP (Module Based)

- Actively collaborated in the development of a module-based ERP system, contributing to both front-end and back-end functionalities
- Played a pivotal role in cross-functional teams, working closely with stakeholders, developers, and end-users to gather requirements, design modules, and ensure seamless integration.

Budget Management App

- Collaborated on a budget management application, designed and implemented the frontend using Vue.js and integrated it with a Laravel API.
- Implemented a chart visualisation feature that enables the admin to easily view and analyse division budget spendings.

Medical Society Mobile App

- Collaboratively contributed to the development of a dynamic mobile app using React Native, fostering seamless teamwork and delivering a user-friendly product.
- Designed and developed a visually stunning and intuitive mobile app using React Native, enhancing user experience and engagement.

MSPNG Admin Dashboard

- Designed and developed a sleek intuitive admin dashboard UI, delivering a seamless UX for efficient management of mspng website
- Collaborated closely with the team to integrate APIs, ensuring smooth communication between the admin dashboard and the MSPNG Website, resulting in streamlined data flow and enhanced functionality.
