PERSONAL PROJECTS

Esolutions (FYP) (05/2021 - 06/2022)
- It is a solution provider application for students.
- It is a web base Application which i develop in three module. Admin, student and teacher where admin play a middle role between teacher and student. Student signup using this website and login is approved by OTP then fills his profile .Admin approve student profile and also add teacher manually. Admin receives assignment, quizzes, mids, projects request from the student and assigns these to the teachers. After the teacher provides solution to what he was assigned for he sends them to the admin and admin gives it to the student.
- This application based on Html , Css, JavaScript , jQuery , bootstrap, core php and phpMailer for mailing purpose.

Factory Management
- Complete factory management project based on core php, html, css and jquery.
- Managing Stocks of hardware parts.

Ucp Blog
- A blogging website for UCP students Community.
- User registers himself by using this website and after the approval from the admin the user/blogger can post his blog for the public.
- Admin can delete the bloggers posts and also manage the notes of all departments.
- Complete project based on core php, html, css and jquery.

Social media Application
- A social media application that built in Laravel 9 in which a user and an admin upload a post, each user has their own dashboard panel through which the user can edit and delete their current posts.
- After uploading a post, all users get a notification in own dashboard and are also notified via email. An admin can delete a user's post if it is offensive. User can also change their profile and password.

Prime tuition
- In this website I add a page that named all subjects offer the page is dynamic mean admin can handle that page through dashboard built in Laravel .
- Add some other pages and fix the issues .
- https://primetuition.co.uk/

Swipencart (01/2023 - Present)
- Complete multi-vendor system built on laravel
- Vendor signup and upload his products and the user purchase the products according to his need
- Admin will monitor vendor activities and also upload the products.
- https://swipencart.com/admin/login/
