SUMMARY

Experienced Full Stack Developer who is comfortable working with Javascript, HTML/CSS, PHP, Laravel and responsive website design to deliver exceptional customer experience.

EXPERIENCE

Php Laravel Developer

The UR solutions

10/2021 - Present Sialkot

The UR Solutions operating in Sialkot from the last 4 years serving their worldwide customers with the best full stack applications.

- Developed and maintained small to Medium sized web based applications based of PHP, Laravel, Mysql, Javascript and jquery.
- Work alongside other developers to implement RESTFUL APIs.
- Used Ajax to dynamically displaying and retrieving data from other sources.
- Worked on CMS systems, Managment Systems, Admin Dashboards.
- Upgrading the existing applications to add new features to adapting client needs.

University Project

We built a Salon Management System during our final year Project in PHP.In this project we made an appointment based system where users book an appointment for a particular day and time. We integrate it with sms service where an sms fired to the users phone number alerting them for their appointment time. We've made an ecommerce like section in it where we list some tool kit products for users if they want to buy them. We integrate this system with an android app and retrieve data from one database.
